Overview & How Billing Works

To have a NextCall AI voice agent answer real phone calls, your number must reach our calling engine over the internet (SIP). There are **three routes** to achieve this. This document explains how each works, **exactly where you need to go** (Jazz / mobile operator or a local carrier), and the full cost breakdown so you can choose confidently.

Every route has **two cost layers**. The telephony layer changes per route; the NextCall portal layer is the same for all three.

LAYER 1 — TELEPHONY

The cost of the line / number itself: the SIM gateway device, the Twilio cloud number + forwarding, or the local SIP trunk & DID. This is paid to the hardware vendor or the telecom operator.

LAYER 2 — NEXTCALL PORTAL

The AI agent usage, billed by NextCall in **credits** (credits = talk minutes). Includes the dashboard, agents, analytics, call recordings and support.

Important — Pakistani numbers & Twilio

Twilio does **not** sell voice-enabled Pakistani (+92) numbers. Route 2 therefore uses a **foreign cloud number (US/UK)** that your Jazz number forwards to. Routes 1 and 3 keep or provide a genuine local number. This is a regulatory limitation, not a NextCall limitation.

The Three Routes to Go Live

1

SIM Gateway Device

Keep your exact Jazz / Zong number · one-time hardware

How it works

A small GSM/VoLTE gateway holds the physical SIM and converts it into a SIP line that connects to the NextCall AI agent. Callers dial the **same number**; the AI answers.

Best for

Clients who must keep their current Jazz number and expect steady call volume.

STEP-BY-STEP — WHERE TO GO

1

Choose & buy the gateway device

Order a 1-SIM GSM/VoLTE gateway (Yeastar / Dinstar) from a local VoIP hardware vendor. NextCall shares recommended models & a verified vendor.

2

Prepare the SIM (Jazz Business Center / franchise)

Use the existing Jazz SIM, or get a Jazz **Business** SIM from a Jazz Business Center. Confirm a voice/minutes bundle suitable for your call volume.

3

Install the device on-site

Insert the SIM, connect the gateway to power and internet (LAN). A static IP or router port-forwarding is recommended.

4

NextCall connects the gateway to your agent

We configure the SIP trunk credential in the platform (BYO SIP) and link it to your AI agent — no number change.

5

Test & go live

We run test calls, tune the agent, then hand over. Callers now reach the AI on your existing number.

Where you physically go

Hardware vendor (device) → Jazz Business Center / franchise (SIM & bundle). No number porting needed.

COST ITEM	TYPE	INDICATIVE PRICE
1-SIM VoLTE gateway (Yeastar / Dinstar)	One-time	PKR 35,000 – 55,000
Multi-SIM gateway (4–16 SIM, for scale)	One-time	PKR 70,000 – 150,000+
Jazz SIM airtime / minutes bundle	Monthly	Per Jazz package
Site internet	Monthly	Existing line

Pros

- Keeps the exact existing number
- Lowest ongoing cost (local SIM rates)
- Full control of the SIM & device

Considerations

- Upfront hardware cost
- Needs reliable on-site power & internet
- Best on a Business SIM (check operator terms)

How it works

NextCall provisions a Twilio cloud number connected to your AI agent. Your Jazz number is set to **forward incoming calls** to that number, so the AI answers every call.

Best for

Quick pilots, or businesses whose callers are mostly international.

STEP-BY-STEP — WHERE TO GO

1

NextCall buys & configures the cloud number

We provision a Twilio number (US/UK) and attach it to your AI agent. Nothing for you to install.

2

Enable international forwarding on your Jazz number

Visit a **Jazz Business Center** or call the **Jazz helpline (111)** and request that **International Call Forwarding / IDD** be enabled on your number (usually requires a postpaid/Business line).

3

Set the call-forward to our number

Activate “forward all calls” to the Twilio number NextCall provides. Typical GSM code: ****21*<number>#** then dial; deactivate with **##21#**. Jazz Business can also set this for you.

4

Test & go live

We place test calls to your Jazz number to confirm the AI answers via the forwarded leg.

Cost warning — international forwarding

Because the Twilio number is foreign, the **Jazz forwarding leg is billed at Jazz’s international/IDD rate**. For Pakistan-heavy call traffic this is usually the most expensive route per minute. Ideal for pilots, not high local volume.

Where you physically go

Jazz Business Center / Jazz Helpline 111 (to enable + set international forwarding). NextCall handles Twilio.

COST ITEM	TYPE	INDICATIVE PRICE
Twilio international number rental	Monthly	USD 30 / mo
Twilio call charge (per minute)	Per minute	USD 0.85 / min
Jazz → Twilio forwarding leg	Per minute	Jazz IDD / intl rate (separate)

Pros

- No hardware — fastest setup
- Great for outbound / global calling
- Scales instantly

Considerations

- Not a real +92 number
- Expensive intl forwarding for PK traffic
- Monthly rental + forwarding airtime

New Local SIP Number (Nayatel / PTCL) + NextCall

Cleanest, legal, best for volume · genuine local +92 number

How it works

A licensed local carrier (Nayatel, PTCL, etc.) delivers a new **local number (DID)** over a **SIP trunk** that connects straight to the NextCall AI agent. The most reliable, fully-compliant setup.

Best for

Professional / long-term deployments and higher call volumes.

STEP-BY-STEP — WHERE TO GO

1

Contact the carrier's business sales

Reach **Nayatel** (nayatel.com/business/sip-trunk) or **PTCL** Enterprise (helpline 1218, care@ptcl.net.pk) and request a **SIP Trunk + DID**.

2

Order channels & DID number(s)

Pick the number of concurrent channels (calls at once) and how many local numbers (DIDs) you need. They quote a monthly rate.

3

Carrier provisions the trunk

They deliver SIP credentials (host, username, password / IP) once your business documents & internet are in place.

4

NextCall connects the trunk to your agent

We add the SIP credential (BYO SIP) in the platform and bind your new local number to the AI agent.

5

Test & go live

We validate quality & concurrency, then publish your new professional local number.

Where you physically go

Nayatel / PTCL business sales (order SIP trunk + DID). NextCall does the technical connection.

COST ITEM	TYPE	INDICATIVE PRICE
SIP trunk (per channel)	Monthly	Carrier quote
Local DID number(s)	Monthly	Carrier quote (per DID)
Local call minutes	Per minute	Low (domestic)
Setup / installation	One-time	Carrier quote

Pros

- Real, legal, high-quality local +92 number
- Low domestic per-minute cost
- Scales with channels; no hardware

Considerations

- New number (not the existing Jazz number)
- Requires a carrier contract & docs
- Short provisioning lead time

SECTION 03

NextCall Portal Charges (All Routes)

Regardless of the telephony route, AI agent usage is billed by NextCall in **credits**. **Credits = talk minutes** — each minute the AI is on a call consumes credits. Your plan includes a monthly allowance; top-ups are available anytime from the dashboard.

NEXTCALL PLAN	INCLUDED MINUTES / MO	MONTHLY	EXTRA MINUTE RATE
Starter	100 minutes	PKR 25,000	PKR 250 / min
Growth	250 minutes	PKR 45,000	PKR 180 / min
Pro / Enterprise	Custom	Custom	Custom

Included minutes are AI talk minutes per month. Additional usage beyond the plan is billed at the extra-minute rate shown. With BYO SIP (Routes 1 & 3) there is no extra telephony transport fee on our side. Full plan details are on the Payment & Pricing page.

SECTION 04

Side-by-Side Comparison

CRITERIA	ROUTE 1 — SIM GATEWAY	ROUTE 2 — TWILIO FORWARDING	ROUTE 3 — LOCAL SIP
Keeps existing Jazz number	Yes	Yes (via forwarding)	New number
Real local +92 number	Yes	No (foreign)	Yes
Upfront cost	Device (one-time)	None	Setup (one-time)
Recurring cost	Jazz airtime	Rental + intl forwarding	SIP trunk + DID
Per-minute telephony	Low (local)	High (intl)	Low (domestic)
Hardware needed	Yes	No	No
Setup speed	Medium	Fast	Medium
NextCall credits	Same	Same	Same

Our recommendation

- **Must keep the current Jazz number** → Route 1 (SIM Gateway).
- **Fastest pilot / global callers** → Route 2 (Twilio), accepting higher per-minute cost.
- **Best long-term, cost-effective for Pakistan** → Route 3 (Local SIP via Nayatel / PTCL).

Payment & Pricing Plans

Choose a NextCall subscription plan below. Plans are billed **monthly, in advance**, and apply on top of your chosen telephony route (device / number / SIP trunk). Each plan includes AI talk minutes; usage beyond the plan is charged at the extra-minute rate.

STARTER	GROWTH	PRO
100 minutes / month	250 minutes / month	Custom volume
PKR 25,000 per month	PKR 45,000 per month	Custom tailored to your usage
✓ 100 AI talk minutes included ✓ 1 AI voice agent ✓ Dashboard & call analytics ✓ Call recordings & transcripts ✓ Extra minutes: PKR 250 / min ✓ Email support	POPULAR ✓ 250 AI talk minutes included ✓ Up to 3 AI voice agents ✓ Dashboard & advanced analytics ✓ Call recordings & transcripts ✓ Extra minutes: PKR 180 / min ✓ Priority support	✓ Custom included minutes ✓ Unlimited AI voice agents ✓ Dedicated onboarding & SLA ✓ Volume discount on minutes ✓ Integrations & custom workflows ✓ Dedicated account manager

Payment terms

- Subscription billed **monthly in advance**.
- One-time charges (device / setup) are payable before provisioning.
- Top-up minutes billed at the plan's extra-minute rate.
- Telephony charges (Twilio / SIP / SIM) billed as per usage.
- Prices exclusive of applicable taxes.

Accepted payment methods

- Bank transfer (IBFT / online banking).
- Debit / credit card.
- JazzCash / Easypaisa (on request).
- International: card or wire (for USD charges).

Note on Twilio (Route 2)

Twilio international number rental is **USD 30 / month** and calls are charged at **USD 0.85 / minute**, billed separately from your NextCall plan. Local routes (1 & 3) avoid these international charges.

SECTION 06

Itemised Quotation

Select one route below. One-time and monthly totals are shown separately. NextCall portal credits apply to every route. Figures marked "quote" are confirmed with the supplier at ordering. Currency mixed as billed (PKR local hardware, USD cloud/AI).

Option A — SIM Gateway (keep your number)

ITEM	QTY	TYPE	UNIT	AMOUNT
1-SIM VoLTE gateway device	1	One-time	[PKR ____]	[PKR ____]
Device configuration & onboarding (NextCall)	1	One-time	[____]	[____]
Jazz Business SIM + minutes bundle	1	Monthly	[PKR ____]	[PKR ____]
NextCall plan (Starter / Growth)	1	Monthly	PKR 25,000 / 45,000	[____]
One-time total				[PKR ____]
Monthly total				[____]

Option B — Twilio Forwarding (fast pilot)

ITEM	QTY	TYPE	UNIT	AMOUNT
Twilio international number rental	1	Monthly	USD 30 / mo	USD 30
Estimated call minutes @ USD 0.85/min	[____]	Monthly	USD 0.85 / min	[USD ____]
Setup & forwarding configuration (NextCall)	1	One-time	[____]	[____]
NextCall plan (Starter / Growth)	1	Monthly	PKR 25,000 / 45,000	[____]
One-time total				[____]
Monthly total (est.)			USD 30 + usage + plan	

Option C — Local SIP via Nayatel / PTCL (recommended)

ITEM	QTY	TYPE	UNIT	AMOUNT
SIP trunk (channels)	[____]	Monthly	[PKR ____]	[PKR ____]
Local DID number(s)	[____]	Monthly	[PKR ____]	[PKR ____]
Carrier setup / installation	1	One-time	[PKR ____]	[PKR ____]
NextCall integration & onboarding	1	One-time	[____]	[____]
NextCall plan (Starter / Growth)	1	Monthly	PKR 25,000 / 45,000	[____]
One-time total				[PKR ____]
Monthly total				[PKR ____]

Terms & Next Step

- Prices are indicative (2026) and subject to final supplier quotes, taxes, and USD/PKR exchange rate.
- Carrier (Nayatel/PTCL) SIP & setup figures are confirmed via their quotation.
- Twilio and AI usage are billed in USD; local hardware/SIP in PKR.
- NextCall portal credits are billed monthly; top-ups available on demand.
- This quotation is valid for 30 days from the date on the cover.

Next step

Tell us your expected monthly call minutes and whether keeping the current number is mandatory, and we'll return a finalised quote with exact figures within 1 business day.
